

R_Tech Group

Compliance Consulting, Design & Test Services

R_Tech Group specializes in compliance and regulatory consulting services. We provide design assistance and testing solutions for both product and system level compliance programs.

The primary focus is to provide effective program management of engineering activities, serving Product Safety, EMC, and other key industry compliance requirements.

R_Tech Group quickly responds to customer specific requirements and will coordinate regulatory projects that meet industry compliance while obtaining timely product approvals.

R_Tech Services

- ❑ R_Tech's program management team plans, supervises and coordinates all phases of compliance and validation activities.
- ❑ R_Tech provides the planning, coordination and implementation of compliance, regulatory and validation procedures.
- ❑ Reviews entire project scope to ensure appropriate compliance and validation requirements are planned and reviewed.
- ❑ Provides expert project assessment while delivering quick quotations covering all aspects of compliance and regulatory services.

Industry Experience

Our staff has years of successful compliance experience and knowledge of key technologies that cross several different industries. R_Tech has direct access to Product Safety and EMC/EMI experts available to perform design reviews and assist with test programs:

- Information Technology Equipment
- Energy Management Equipment
- Industrial Control Equipment

Project plans are defined to meet industry standards while addressing unique market requirements for each client. The primary focus is to provide "on time" delivery of documentation packages such as IEC/CB Reports, NRTL agency Marks and EMC/LVD declarations. R_Tech can assist with the following agency approvals and marks:

Domestic Approvals

UL, CSA, ETL, FCC, NEBS

European Approvals

CE, TÜV, SEMKO, CISPR

International Approval

CTICK, IEC, ISO, NOM
